

Mohd Faiz

Cybersecurity Student | Aspiring Penetration Tester

📍 Meerut, Uttar Pradesh 📞 9103934488 ✉ faizmairaj4@gmail.com 🌐 Mohd Faiz 🐙 GitHub
🔗 Portfolio

PROFESSIONAL SUMMARY

Cybersecurity student pursuing a Bachelor's degree in Computer Applications (BCA) and a Master's Diploma in Cyber Security, with hands-on experience in networking, Linux administration, web application security, and penetration testing. Skilled in using tools such as Burp Suite, Nmap, Metasploit, Wireshark, and Hydra through practical labs and security assessments. Built cybersecurity projects including **ReconForge**, an enumeration playbook for penetration testers, and completed multiple TryHackMe labs focused on web, network, and Linux security. Passionate about offensive security and eager to contribute as a **Junior Penetration Tester** or **Vulnerability Assessment & Penetration Testing (VAPT) Analyst**.

TECHNICAL SKILLS

Operating Systems

- Kali Linux
- Arch Linux
- Windows 11

Web Application Security

- Web Enumeration
- OWASP Top 10
- Burp Suite
- Directory & Subdomain Enumeration
- Basic SQL Injection Testing
- Basic Cross-Site Scripting (XSS) Testing

Tools

- Nmap
- Burp Suite
- Metasploit Framework
- Wireshark
- Hydra
- John the Ripper
- Netcat
- Gobuster
- Nikto
- Wappalyzer
- WhatWeb

Networking

- TCP/IP
- OSI Model
- Routing & Switching
- DHCP, NAT, ACLs
- Subnetting (FLSM/VLSM)
- Network Troubleshooting

Penetration Testing

- Vulnerability Assessment
- Network Enumeration
- Web Application Testing
- Linux Privilege Escalation
- Password Security Testing

Virtualization

- VMware Workstation

PROJECTS

★ ReconForge – Cybersecurity Enumeration Playbook

05/2026 – 06/2026

Tech Stack: HTML, CSS, JavaScript, GitHub Pages

- Developed a cybersecurity-focused enumeration playbook to assist penetration testers during reconnaissance and enumeration phases.
- Covers 100+ commonly used ports and services with structured attack paths, enumeration methodology, and recommended tools.
- Includes service-specific commands for Nmap, SMB, FTP, SSH, HTTP, DNS, SMTP, SNMP, LDAP, RDP, MSSQL, MySQL, PostgreSQL, Redis, Docker, Kubernetes, and many more.
- Provides methodology-based guidance for vulnerability assessment and penetration testing.
- Published as a responsive web application using GitHub Pages.

Live Demo: <https://faizcybersecurity.github.io/cybersecurity-portfolio/projects/ReconForge/index.html> 🔗

TryHackMe Labs & Write-ups

- Completed hands-on TryHackMe rooms covering web application security, Linux privilege escalation, Windows exploitation, network enumeration, and Active Directory fundamentals.
- Documented methodologies, attack paths, findings, and remediation techniques in structured write-ups.
- Used tools including Burp Suite, Nmap, Metasploit, Hydra, Gobuster, Wireshark, and Netcat during practical labs.

Write Up's: <https://github.com/FaizCyberSecurity/cybersecurity-portfolio/tree/main/tryhackme-writeups> 

EDUCATION

Bachelor of Computer Applications (BCA)

Gyan Bharti College, Meerut

08/2026 – Present

Master's Diploma in Cyber Security

CRAW Academy, Delhi 

07/2025 – Present

CERTIFICATIONS

- In-Depth Advanced Networking Certificate
- Ethical Hacking
- Web Penetration Testing
- Linux Essentials
- Advanced Penetration Testing

PRACTICAL EXPERIENCE

TryHackMe

- Completed 20+ practical cybersecurity labs.
- Performed web application testing using Burp Suite.
- Conducted network enumeration using Nmap.
- Practiced Linux privilege escalation.
- Performed password auditing using Hydra and John the Ripper.
- Documented findings and remediation recommendations.

ACHIEVEMENTS

- Built ReconForge – Cybersecurity Enumeration Playbook.
- Published cybersecurity projects on GitHub.
- Created technical write-ups for TryHackMe labs.
- Actively learning Offensive Security and Web Penetration Testing.
